

Body Wash - Fresh

Products Highlighted: *Floraesters K-20W® Jojoba, Florabeads® Jojoba, and Florapearls® Jojoba STD*

Florapearls Jojoba and Florabeads Jojoba create a visual impact while providing gentle exfoliation in this foaming wash. The combination of neutralized fatty acids and Floraesters® K-20W Jojoba creates a smooth, dense foam which leaves the skin feeling clean, fresh, and moisturized.

Phase	Trade/Common Name	INCI Name	Manufacturer	%wt/wt
A.	Propylene Glycol USP/EP	Propylene Glycol	Ashland, Inc.	10.00
	NAA®-122	Lauric Acid	NOF America Corporation	7.00
	NAA®-142	Myristic Acid	NOF America Corporation	3.00
	NAA®-160	Palmitic Acid	NOF America Corporation	1.00
	Oleic Acid P	Oleic Acid	NOF America Corporation	1.00
	Deionized Water	Water	-----	10.00
B.	Potassium Hydroxide (85%)	Potassium Hydroxide	Tokyo Chemical Industry, Co.	3.50
	Deionized Water	Water	-----	5.00
C.	Promidium® CO-LQ-(AP)	PPG-2 Hydroxyethyl Cocamide	Croda, Inc.	5.00
	Alscop NS-230	Sodium Laureth Sulfate	Toho Chemicals	4.00
	Obazolin CAB-30	Cocamido Propyl Betaine	Toho Chemicals	6.00
D.	Deionized Water	Water	-----	17.00
	Chelest 2D-SD	Tetrasodium EDTA	Chubu Chelest	0.10
	Carbopol® Aqua SF-1 Polymer	Acrylates Copolymer	The Lubrizol Corporation	13.00
E.	Floraesters K-20W Jojoba	Hydrolyzed Jojoba Esters (and Water (Aqua))	Floratech	3.00
	Deionized Water	Water	-----	q.s.

G.	Florabeads Jojoba 28/60 White (Natural)²	Jojoba Esters	Floratech	1.00
	Florapearls Jojoba STD Evergreen²	Jojoba Esters	Floratech	1.00
Total				100.00

Mixing Procedure

- Heat the Propylene Glycol USP/EP to 65-70°C with stirring. Add remaining ingredients of Phase A in the order listed with stirring until fully dissolved.
- Dissolve the Potassium Hydroxide (85%) in the deionized water listed in Phase B. Slowly add this solution to Phase A at 70-75°C with stirring to neutralize fatty acids.
- Add the ingredients of Phase C to Phase AB in the order listed at 60-65°C.
- Create a pre-mix of Phase D by adding the ingredients in the order listed. Slowly add Phase D to Phase ABC. Allow mixing time for the polymer to disperse completely in solution.
- Mix the Floraesters K-20W Jojoba in the first deionized water listed in Phase E. Add this pre-mix slowly to Phase ABCD at a mix temperature of 60-65°C. Pre-mix the Potassium Hydroxide (85%) in the second deionized water listed in Phase E. Use this pre-mix to finish neutralizing the Carbopol Aqua SF-1 Polymer by adding it very slowly to Phase ABCD.
- Start cooling the batch to room temperature. Add the fragrance of Phase F to Phase ABCDE at a mix temperature of 40-45°C. Determine the pH and viscosity of the mixture before adding Phase G with hand sweep agitation to complete the formula.

¹ Fragrance: Concentration for Bodysoap 05126 supplied by Innovation Corporation

² Any color or combination of colors may be used.

Typical Properties: pH: 8 - 9
Viscosity: 35,600 - 38,120
