

# Introducing L<sup>22</sup>

- Delivers the Skin Lipid Profile of a Healthy 22-year-old
- Hydrates Skin Better than Common Emollients
- Improves Skin Elasticity and Firmness
- Improves Skin Barrier Recovery

## Skin lipid components...

...balanced as they were at age 22

### About L<sup>22</sup>

Healthy skin produces many different lipid components including wax esters, sterol esters, triglycerides, squalene and sterols.

Healthy skin maintains these lipid components in a proper balance. This balance changes as we age.

L22 delivers these skin lipid components in the same balance as present on a healthy 22-year-old.

L22 is not a simple blend. L22 is a patented, noncomedogenic lipid complex, carefully engineered from botanically sourced lipids and designed to deliver the skin surface lipid profile of a healthy 22-year-old.
