Introducing L22

- Delivers the Skin Lipid Profile of a Healthy 22-year-old
- Hydrates Skin Better than Common Emollients
- Improves Skin Elasticity and Firmness
- Improves Skin Barrier Recovery

Skin lipid components...

- Triglycerides
- Wax Esters
- Sterol Esters
- Sterols
- Squalene

...balanced as they were at age 22

About L22

Healthy skin produces many different lipid components including wax esters, sterol esters, triglycerides, squalene and sterols.

Healthy skin maintains these lipid components in a proper balance. This balance changes as we age.

L22 delivers these skin lipid components in the same balance as present on a healthy 22 year old.

L22 is not a simple blend. L22 is a patented, noncomedogenic lipid complex, carefully engineered from botanically sourced lipids and designed to deliver the skin surface lipid profile of a healthy 22 year old.

L22 is So Revolutionary, It’s Patented
Clinically Substantiated Claims

L22 improves the recovery of skin barrier function better than common emollients. Clinical studies show that L22 also increases the elasticity, firmness, and hydration of skin. As depicted in the graphs below, L22 produces far better results than the tested common emollients.

Barrier Recovery with Ceramide 1
CS 13-056

Improved Skin Hydration, Elasticity, and Firmness
CS 13-054, CS 13-055

Barrier Recovery with Ceramide 2
CS 12-047

Applications
Typical Use Level
Skin Care 3 - 20%

Floratech Formulations
Formula Number
iSerum with L22 L042
L22 Night Repair Face Cream L043
L22 Day Cream with Sunscreen Actives L044

Global Regulatory Data
CAS: 97593-46-9 (and) 111-02-4 (and) 68990-51-2 (and) 68555-08-8 (and) 1406-18-4
EC: 307-351-1 (and) 203-826-1 (and) 273-605-2 (and) 271-413-3 (and) 215-798-8
Globally Approved including:
Australia, China, EU, Japan, Korea and US
