Lavender Lotion

Products highlighted: Floraesters[®] K-20W Jojoba, Florasomes[®] Jojoba with Fragrance

This formula produces a facial lotion for daily use. It contains a UVB sunscreen and Floraesters K-20W Jojoba, which helps the product last longer, imparting substantial skin protection throughout the day. For a lighter skin feel, yet continued substantivity, the formulator may reduce the level of Floraesters K-20W Jojoba to 5%. The Jasmine Florasomes, with a lavender fragrance, provide a striking visual effect and pleasant fragrance.

Mixing Procedure:

- Mix ingredients of Phase A together with propeller agitation (PA) at 75-80°C.
- Premix the Floraesters K-20W Jojoba into the water at 80°C and stir until completely mixed. When the Floraesters K-20W Jojoba is fully dispersed, mix in the Glycerin USP 96%. Stir in the Keltrol CG BT very slowly, allowing time to hydrate. Continue mixing with PA at 80°C.
- Add Phase A to Phase B with high speed PA.
- Cool to room temperature with moderate PA. Add preservative at 40°C
- Add Phase C to complete mixture with sweep agitation until Florasomes are evenly distributed throughout lotion.

¹ Any color or combination of colors may be used. This particular formula uses Jasmine (Red 30 (and) Talc, Ultramarines). Other playtimes are available.
