

Florasun[®] 90

Stable High Oleic Sunflower Oil

Benefits & Functions:

- Extended Shelf Life
- Low Color and Odor
- Hydrating
- Noncomedogenic
- Oxidatively Superior to Traditional and Mid-Oleic Sunflower Oils
- Elegant Skin Feel
- Non-GMO

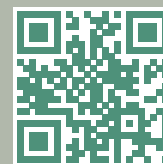

Superior Oxidative Stability

Florasun 90

Florasun 90 is a natural triglyceride oil with excellent emolliency, and superb oxidative stability attributed to its high oleic content of >85% and low levels of polyunsaturates.

Oleic acid, found in skin surface lipids, is the major fatty acid in Florasun 90 which allows for easy absorption into the skin without the greasy skin feel typical of other oils. The oil is pressed from the finest sunflower seeds carefully refined to produce a low color and low odor product.

Florasun 90 can extend the shelf life of finished formulations. Use Florasun 90 in formulations that benefit from a stable, natural emollient including: lipsticks, pressed powders, foundations, skin care, hair care, sun care, bath oils, and massage oils.

Extend Shelf Life with Florasun 90

Superior oxidative stability even in pro-oxidative environments

Florasun 90 is oxidatively stable due to its low levels of polyunsaturates and high levels of monounsaturates. Traditional sunflower oil has high levels of polyunsaturates, making it much less stable and not suitable for cosmetics. The stability of Florasun 90 contributes to more stable finished formulations.
